

### REMARKS

This Amendment submits a replacement title for the subject application. The replacement title more accurately describes and distinguishes the present invention from other floatation system inventions owned by the applicant. Additionally, the title listed above was previously submitted on the specification in the priority application, U.S. Patent Application Serial No. 09/961,787, filed on September 21, 2001.

### CONCLUSION

It is believed this amendment now has placed the application in condition for allowance. If necessary, the Commissioner is hereby authorized in this and concurrent replies to charge payment (or credit any overpayment) to Deposit Account No. 50-0683 of Luce, Forward, Hamilton & Scripps. The Examining Attorney is encouraged to telephone the undersigned with any questions regard this matter.

Respectfully submitted,

June 9, 2006
